

Open position for an Organic Chemist (m/f)

About CEBINA:

CEBINA GmbH is a biotech incubator advancing cutting edge projects in various fields of biomedical research, including drug discovery and synthetic chemistry.

CEBINA is looking for an organic chemist (m/f) with strong background in:

- Organic Synthesis (excellent knowledge of theoretical background and practical workflow)
- Compound analysis and characterization
- Data analysis and reporting

The position is mainly laboratory based.

Your responsibilities:

- Conducting multistep synthetic procedures
- Operating different instruments of modern organic synthesis (microwave reactors, continuous flow reactors, ozone generator...)
- Applying different methods of compound purification and characterization (chromatography-and distillation techniques, NMR-spectroscopy...)
- Accurate documentation of production processes

Your ideal qualifications:

- Degree in chemistry (PhD, MSc, Dipl Ing) with corresponding lab experience
- More than 2 years of experience in synthetic organic chemistry in an industrial or academic laboratory
- Well-organized working style with the ability to work with high accuracy according to quality standards (SOPs)
- Fluent in English

Our offer:

- A permanent position within an experienced international team
- Training and personal development opportunities
- State of the art laboratory and office infrastructure
- A creative, dynamic and innovative work environment

The monthly salary amounts to 3.200 EUR gross income, based on fulltime employment (40 hours per week). A higher salary is possible depending on the experience and fit of the candidate.

Application should be sent until January 22, 2021 to application@cebina.eu.
